

BULOVA 1981 SUPPLEMENT

Ed Southwick

BULOVA

Years ago, one watch was all a person ever needed. But life styles changed and fashions with them. Today, the timepiece one wears to work, may not be the same one wears to jog or garden or attend a formal party. The only thing that hasn't changed with time is the demand for watch reliability.

Bulova reflects time-telling technology at its most dependable. Bulova Quartz watches are modern marvels, so precise they will stay accurate to within one minute a year. The Bulova mechanicals, backed by a century-old watchmaking tradition, represent master craftsmanship and the jeweler's art at their finest.

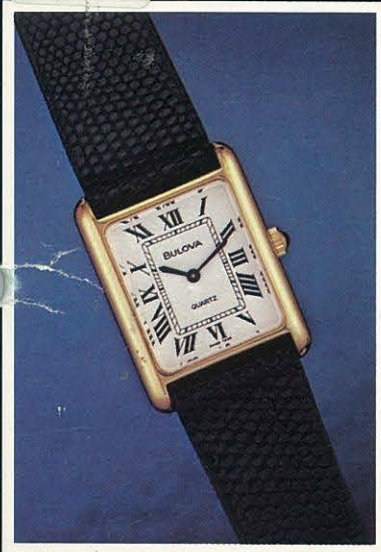

Whatever life styles your customers pursue, there are reliable Bulova watches to match their many needs. From the excitingly contemporary to elegant diamond dials, styles in precious 14K gold and infinite variations in between.
