# THE QUICK and EASY WAY TO FIND YOUR CRYSTAL

**1** Measure Length and Width of Bezel with millimeter rule.

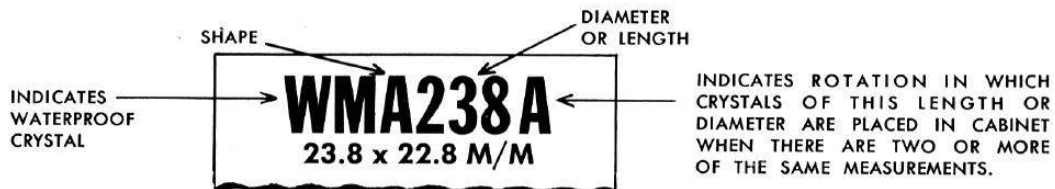

**2** Turn to pages where proper shape is listed. The length and width is shown on illustration of crystal. The most popular watch it fits is also shown.

**3** The number under the crystal is the key to its location in your crystal cabinet. This number is also used for re-ordering.

## H-Q PERMATEX NUMBERING SYSTEM

## DEFINITION OF CLASSIFICATION

**POPULAR** . . . Crystal shapes marked "POPULAR" are for the newest as well as the most popular of older models. All crystals marked "POPULAR" are included in all our Crystal Cabinet Systems.

**SERVICE** . . . Crystals marked "SERVICE" are for models of watches not popular enough to be included in your crystal cabinets. We keep them on hand as a "service" to our customers, but they should not at any time be stocked. They are available on request as listed.

**MOULDED** . . . Crystals such as Cylinder, Fancy Flat Top, Gable Top, Stone Cut, etc. made of MOULDED GLASS. See following pages of this catalog for complete description. Order by number under Moulded diagram. Include prefix "P" in number. Example (P5MC215).

**R-C** . . . Crystals marked "R-C" or ROCK-CRAFT are double thick Watch-Craft Crystals. Only shapes marked "R-C" can be furnished in double thick Rock-Craft Quality. Order by Watch-Craft number and also state R-C. Example (2A236 R-C).

### PERMATEX

**YEARS OF GLASS GRINDING EXPERIENCE USED TO ATTAIN THIS CRYSTAL PERFECTION**

Made in U. S. A. by master craftsmen with years of glass grinding experience these WATCH-CRAFT TAILOR-MADE CRYSTALS give you everything you desire and should expect from the finest watch crystals on the market today.

TAILOR-MADE to fit the actual watch manufacturer's bezels. When replacing a broken crystal with a tailor-made WATCH-CRAFT you are using the same size, shape and style crystal the watch factory uses.

The big feature of these crystals which places them ahead of all others is the NEW EDGE made TO PREVENT CHIPPING. The regular edge (see illus. 1) comes to a sharp edge which chips very easily. The improvement over that was the beveled edge (see illus. 2) which was to have taken the sharp edge away, but only gave the crystal two sharp edges to chip. Now, the greatest improvement—the WATCH-CRAFT TAILOR-MADE CRYSTAL has a polished and buffed edge (see illus. 3) which although so fine is not easily detectible to the eye, has no sharp edge at all, thereby preventing chipping.

# WATCH-CRAFT ROUND GLASS CRYSTALS

REG. U.S. PATENT OFFICE NO. 348436

**195** **WATCH-CRAFT ROUND**  
REG. U.S. PATENT OFFICE NO. 348436  
**\*\* POPULAR** Glass Crystals

**38** **WATCH-CRAFT ROUND**  
REG. U.S. PATENT OFFICE NO. 348436  
**\* SERVICE** Glass Crystals

For Ladies' and Men's  
 Wrist Watches

EXAMPLE: RG08.1 is 8 and 1/10 mm. diameter.

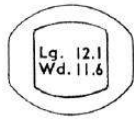

These Watch-Craft Round Crystals are necessary in fitting round model ladies' and men's wrist watches with the deep groove perpendicular edge bezels. Regular Mi-Concave or Chevee type edge crystals do not fit properly. The edges of Watch-Craft Round Crystals are ground and finished in the same high quality manner as the WATCH-CRAFT "Tailor-Made" Fancy Crystals. Made in U.S.A. by our skilled craftsmen in crystal manufacturing. For your convenience, the crystals are labeled in metric sizes to 1/10 MM diameters.

**\*\*POPULAR**  
 "Popular" Watch-Craft Crystal shapes are listed in the heavy bold face type. They are for the newest as well as the most popular of older watch models. All "Popular" crystals are included in our crystal cabinet systems.

**\*SERVICE**  
 "Service" Watch-Craft Crystal shapes are listed in light face type above. They are for models of watches not popular enough to be included in your crystal cabinet. We keep them on hand as a "service" to our customers, but we do not advocate the stocking of these by the watchmaker or jeweler. They are available on request as listed.

# FINEST CRYSTAL CEMENTS WITH THE NEDLPOINT TUBE

## WELD-IT CEMENT

Weld-It Cement, as well as other Marshall cements, is supplied in the Nedlpoint tube ...and is well known to watchmakers and jewelers as Weld-It Cement and other Marshall cements are well known to watchmakers and jewelers as the best cements obtainable. Invisible, dust proof and possess great strength. Can be depended on for a completely satisfactory, permanent job. All of them are supplied in the famous Nedlpoint tube.

No. 18066

Large tube.....35c each

## CROMAR'S CEMENT

Another of the famous family of Marshall cements...made only in Marshall laboratories by skilled chemists. Every tube bears the guarantee of satisfaction from the largest company of its kind. Be sure to try a tube of each of these cements ... then decide which you prefer. See quantity prices below.

No. 18061

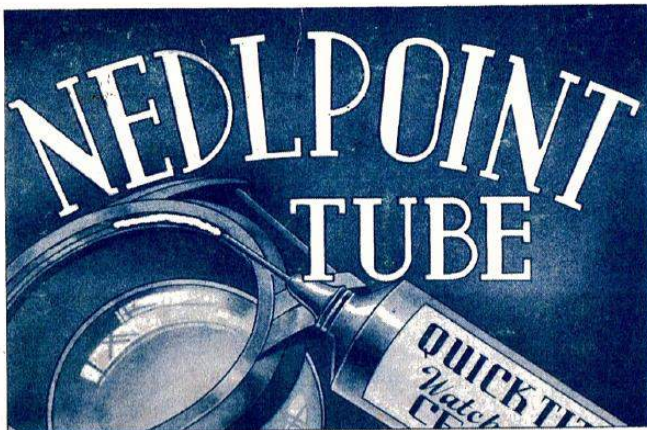

Large tube.....35c each

## NO-BREAK CEMENT

Specially developed for greatest efficiency with unbreakable crystals. Crystals cannot come loose from bezel because of the unusual adhesiveness of the cement to both crystal and bezel. No-Break cement remains in semi-plastic state and compensates for any slight expansion or contractions caused by heat or cold. No-Break Unbreakable Crystal Cement.

No. 18067

Large tube.....35c each

## NO WASTE

What you have always wanted ... a quick, simple way to get the cement evenly into the bezel, with all the mess eliminated. Marshall cements have a hypodermic needle end. The cement is applied to the bezel in just the right quantity required (see illustration at left) for a neat, even, permanent dust-proof job. No smearing, spilling or oozing out at edges. No wasted cement. Try this modern method and you'll never use anything else.

LASTS OVER 3 TIMES  
AS LONG.
